CD A Diario. Telmary

Telmary is the most outstanding and talented feminine figure inside the HIP HOP CUBAN RAP movement with some tendencies to the fusion style. Adding to the great quality of the texts and musics is her unusual contralto voice that impressed those who had the opportunity to listen to her. It is an honour to have her in our collection since she represents, among other

talented young artists, a musical movement that imposes itself not only in Cuba but in the rest of the world. Also it's important to know that she is leaving right now in Toronto, so she has show and promotional activities in the city.

CD Tambor de fuego. Muñequitos de Matanzas. This album was nominated to the Latin Grammy 2009.

The Munequitos de Matanzas is one of the classics of Cuban folklore, the history of Rumba could count through them, not just because they are older groups, not only because from the first disc have enjoyed tremendous popularity, but also because they have tempered their time without losing their traditions, because they have cultivated and patented that particular ways of music and dance the

rumba. With dolls is a before and after the Cuban Rumba. They make an elegant rumba, foundation, are the true flavor of the academy, which imposed a stamp rumba palpable in every scene. They never run out of passion, graying his elders with younger faces, their wealth is multiplied because its authenticity is strengthened. Not sickly because they pretend, convince because they live and vibrate whenever the music plays. Masters of the box and the drum, are the skin of a drum that never silent, voices that reach us from the heartland.
